- Improved transparency of the cost of disaster recovery services
- Strict environment controls and protection
- Free infrastructure support team
- Access anywhere, anytime
- No Capital expenditure

The ability to recover from a disaster is crucial for the long term sustainability of an Organisation. The US Congress 'Back to Business Act, 2007' provides some shocking statistics on the impact of disasters on Organisations:

- 43 percent of businesses that close following a disaster never reopen
- an additional 29 percent of businesses close down permanently within 2 years

Quintica Disaster Recovery Managed Service ensures that you have the controls in place to be part of the 28% that make it past the 2-years.

Solution Architecture:

With your disaster recovery either based in our private cloud, hosted in our datacenter or a combination of the two, you're no longer risking the long term survival of your Organisation on the reliability of IT equipment that has been sat gathering dust and depreciating for months, or even years.

Instead you can rest assured in the peace of mind that your Disaster Recovery site is hosted in a secure, fully redundant environment and can be trusted to work when you need it to the most.

Whether you're looking for full site recovery capabilities or a support mechanism to recover from data loss, Quintica can work with you to identify the appropriate solution.

Facilities:

Quintica's data centre facility features comprehensive physical security, UPS, emergency backup generators, and fire Suppressant systems, ensuring your data remains safe at all time. Quintica have adopted a 'Green Computing' strategy for managing the data center, giving you piece of mind that your data is not only safe but managed responsibly.

About Quintica

Quintica is a quality driven, consulting, education, technology and managed service provider. We assist companies to meet their business objectives by understanding and bridging the gap between their defined strategy and operations.

We ensure the correct people, processes (operational & support) and technology are in place to support and deliver the key services your Organisation depends on; this is done using our proprietary methodology, the Q-Journey.

The Q-Journey is based on international standards and frameworks and is delivered through a collaborative approach to ensure the highest level of quality is maintained.

The Q-Journey focuses on helping Organisations manage their COSTS, CASH and CUSTOMERS to ensure long term business sustainability and covers the full spectrum from consulting and training to implementation and cloud computing services.

Quintica was founded in 2001 with a remit to create a classic Service Management company. In 2009,

Quintica and the Eaton Group, a telecommunications infrastructure provider, saw an opportunity to extend an existing and very successful joint venture and the two companies merged.

Quintica has developed its business based on four core services; Information Technology, Business Management, Human Resources and Customer Relationship Management, each of which shares an objective to achieve and maintain global standards. Through these services we enable our clients to enhance their business, manage cash-flow, reduce their costs and attract new customers, resulting in businesses which stand head and shoulders above the competition.

To deliver our promise, we access the widest array of specialist expertise. Our approach is a collaborative and consultative one, with no pre-subscribed solution, but rather a bespoke creation deployed to suit your specific requirements based around our methodology.
