

## Benefits

- Free-up IT resource to focus on Business Critical activities
- Pay-as-you-go pricing models
- Ability to rapidly provision new users
- Improved transparency of the cost of email services
- No capital expenditure
- Access anywhere, any-time

In the same way as Cloud Computing has revolutionized the enterprise infrastructure, Cloud Communications are starting to reshape the way we manage Enterprise Communications. Quintica's cloud-hosted Exchange services offer enterprise grade email facilities at a fraction of the cost of managing an email service in-house and provides you with the peace of mind that your most critical, widely-used application is in safe hands.

Hosted Exchange enables you to enjoy the benefits of business class email in a 'pay as you go' model, giving you the flexibility to scale up or down as needed and free up valuable capital, IT staff and other costly resources for more effective, strategic use within your company.

### Solution Architecture:

Quintica's current service offering focuses on cloud hosted Exchange, Office Communicator and Share-Point Services to provide you with the tools needed to ensure you can communicate and collaborate freely with colleagues, packaged into a solution that means you only pay for what you use.

With Microsoft Exchange as the mail server and Microsoft Outlook as your client, your employees can do more than send and receive email – they can share calendars, folders and contacts. Outlook is available for desktop, browser, and mobile access so you're always connected, whether you're in the office, travelling, or working at home. And since you always connect to the same Exchange server, your inbox stays synchronized, no matter which Outlook client you're using.

### Peace of Mind

Email has become a critical business tool. Research indicates up to 70% of business data resides in email. The temporary or permanent loss of email, not to mention corporate contacts, files and calendar information, can translate into lost revenue, lost customers and the inability to conduct day-to-day business.

Quintica's business-class email includes a daily backup of your email, calendar items, business contacts and shared files and folders. Basic or 'free' services often only backup every week, and once you've downloaded an email to your laptop it is 'lost' from the server and cannot be recovered regardless of backups. Don't take the risk.

### Get More Done

Too often, critical business documents are swapped around in e-mail. Controlling versions and protecting the 'master' copy can be a nightmare. Employees never know which version to work from, and if they don't have their laptop or PC in front of them, they can't access the latest document.

Quintica's business-class email includes shared folders that can be accessed from any Internet connection, providing a complete document management capability such that employees are always working off the same page.

### Anywhere Access

Employees are increasingly mobile, working from the office, at home, at client sites and on the road. Carrying a laptop around town just to access critical business files is a challenge, and not having access to this information can be disastrous when you have an urgent business need.

Business-class email includes support for access from Smart Phones, Pocket PC's or any Internet-

connected PC; including access to email, calendars, contacts, and shared folders with critical business files. Never miss a business opportunity!

### Facilities:

Quintica's data centre facility features comprehensive physical security, UPS, emergency backup generators, and fire Suppressant systems, ensuring your data remains safe at all time. Quintica have adopted a 'Green Computing' strategy for managing the data center, giving you piece of mind that your data is not only safe but managed responsibly.

### About Quintica

Quintica is a quality driven, consulting, education, technology and managed service provider. We assist companies to meet their business objectives by understanding and bridging the gap between their defined strategy and operations.

We ensure the correct people, processes (operational & support) and technology are in place to support and deliver the key services your Organisation depends on; this is done using our proprietary methodology, the Q-Journey.

The Q-Journey is based on international standards and frameworks and is delivered through a collaborative approach to ensure the highest level of quality is maintained.

The Q-Journey focuses on helping Organisations manage their COSTS, CASH and CUSTOMERS to ensure long term business sustainability and covers the full spectrum from consulting and training to implementation and cloud computing services.

Quintica was founded in 2001 with a remit to create a classic Service Management company. In 2009, Quintica and the Eaton Group, a telecommunications infrastructure provider, saw an opportunity to extend an existing and very successful joint venture and the two companies merged.

Quintica has developed its business based on four core services; Information Technology, Business Management, Human Resources and Customer Relationship Management, each of which shares an objective to achieve and maintain global standards. Through these services we enable our clients to enhance their business, manage cash-flow, reduce their costs and attract new customers, resulting in businesses which stand head and shoulders above the competition.
